CONTRACTOR'S  
PRODUCT GUIDE

[www.dukecorp.co.za](http://www.dukecorp.co.za)

Introducing Duke Premium Paints – a proud product of DukeCorp Holdings.

Duke Construction has been providing quality contracting services since 2004, with only satisfied clients nationwide. As such, we have a wealth of experience in general construction and renovations, an intimate knowledge of paint and construction products and techniques, and a tremendous understanding that a client's needs and ultimate satisfaction are of paramount importance.

That's why we're proud to present Duke Premium Paints – a range of coatings and products from A-Z, developed by contractors for contractors, from only the finest ingredients and to the highest industry standards.

Our premium products are manufactured with an emphasis on durability as well as affordability, because we know that you want to promise your clients a reputable product, an exceptional client experience, and a service they can always trust.

We look forward to being your trusted supplier of paint and construction products, to provide you with a product and a level of personal service to exceed your expectations, and to ensure each of your projects is as smooth and satisfying for you as it is for your clients.

## PREMIUM PAINTS

### ACRYLIC HIGH SHEEN

- High sheen finish
- Excellent quality
- Water-based
- Washable
- Excellent scrub resistance (25 000 cycles)
- High durability
- Interior and exterior applications
- Spread Rate Approx. 8-10sqm per m<sup>2</sup> / litre

### ACRYLIC MID SHEEN

- Suede finish
- Excellent quality
- Water-based
- Washable
- Great scrub resistance
- High durability
- Interior and exterior applications
- Spread Rate Approx. 8-10sqm per m<sup>2</sup> / litre

### ACRYLIC LOW SHEEN

- Low sheen finish
- Excellent quality
- Water-based
- Semi washable
- Good scrub resistance
- High durability
- Interior and exterior applications
- Spread Rate Approx. 8-10sqm per m<sup>2</sup> / litre

### SUPER ACRYLIC

- Matte finish
- Great quality
- Water-based
- Good scrub resistance (10 000 cycles)
- Durable
- Spread rate approx. 8-10sqm per m<sup>2</sup> / litre
- For interior and exterior applications

### HIGH HIDING

- Matte finish
- Great quality
- Water-based
- Durable
- Average scrub resistance
- Interior and exterior applications

## OUR QUALITY GUARANTEE

We're so proud of the quality of our products that we offer up to a twelve year guarantee on selected products to ensure your utmost satisfaction and peace of mind. Head over to our website to register your product and claim your guarantee.

# PREMIUM ENAMEL COATINGS

## GLOSS ENAMEL SOLVENT-BASED - QUICK DRY

Our quick dry is an excellent industrial enamel specially designed for spraying and dipping. Full gloss finish.

## GLOSS ENAMEL SOLVENT-BASED

A long oil alkalyd gloss enamel paint that exhibits a good opacity with a high gloss finish.

## GLOSS ENAMEL WATER-BASED

Excellent washability and durability. For use on interior or exterior primed surfaces of wood, masonry and metal.

## POLYURETHANE ENAMEL

Our polyurethane wall coating is a single-pack coating for application onto prepared masonry walls. Excellent gloss finish.

## EGGSHELL ENAMEL

A long oil alkalyd gloss enamel paint that exhibits a good opacity with a suede finish. Available in White. Can be tinted.

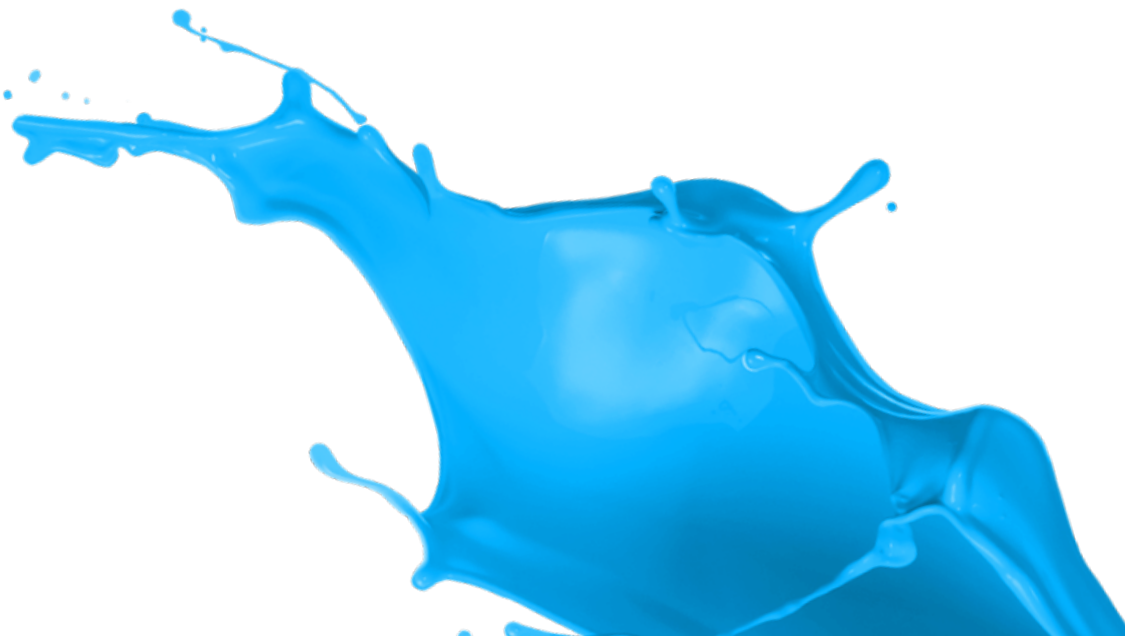

*Prices available  
on request.*

*SPECIAL REQUEST?  
Chat to our specialists.*

## A PASSION FOR COLOUR

Our colour specialists can match any colour you desire. Having interior design specialist knowledge within our team of experts means that we're also able and happy to advise you on the best shades that will ensure a complementary flow of harmony throughout your space.

## CONTRACTORS VALUE PAINTS

### **FILLER COAT**

Good general contractor's paint for use on new walls of plaster. The particle size is coarser than new paint systems to fill the 'voids' on new plaster surfaces. Scrub resistance vastly higher than opposition products.

### **DECORATOR'S SPECIAL ACRYLIC**

Low-cost paint designed mainly for the contractual market for interior and exterior first coat applications.

### **CONTRACTOR'S SPECIAL ACRYLIC**

Low cost budget quality paint for interior and exterior first coat applications.

## ROOF PAINTS

### **ROOF GUARD PREMIUM**

Excellent quality 100% pure acrylic water-based roof coating. Good durability and flexibility. Our roof paint is supplied in standard colours that are obtained by the use of iron oxide pigment powders, thereby ensuring excellent colour stability and performance. Scrub resistance 15 000 cycles.

### **ROOF KOTE CONTRACTOR'S**

Good quality 100% pure acrylic water-based roof coating. Medium durability and flexibility. Our roof paint is supplied in standard colours that are obtained by the use of iron oxide pigment powders, thereby ensuring excellent colour stability and performance.

*Prices available  
on request.*

# CEMENTITIOUS PRODUCTS

## **CHEM PLUS**

A cement-based paint comprising of a composition of sand, white Portland cement, pigment and cement modifiers to enhance the product.

## **CHEM KEY**

A is a synthetic latex based admixture specifically developed for use as a water resistant keying agent where improved flexibility & adhesion of the compound to the background is required.

## **CHEM BOND**

A synthetic latex based additive specifically developed for use with Patching Compound where the product needs to be waterproofed. In addition the adhesion & flexibility of the product is increased. Where extra waterproofing/adhesion properties are required the water intake must be replaced with Chem Bond.

## **CHEM POOL**

Chem Pool is a 2 pack system comprising of a highly re-enforced, pigmented, white Portland cement based product that is mixed with Chem Add to form a brilliant white smooth coating that is applied onto marbelite pool surfaces that have become rough and stained. Chem pool is applied using a lambs wool roller and/or paint brushes in exactly the same manner as a conventional paint.

## **SURESKIM**

A cement-based ready-mixed, ready-to-use skimming compound comprised of binder composition using rapid hardening cement, dolomite, lime and redispersable acrylics that ensure full waterproofing with sufficient compressive strengths. Sureskim can be used on cement plaster, cement fiber board, and weather board. The product must be applied at a bed depth of 2-6mm.

## **CHEM POOL**

Chem Pool is a 2 pack system comprising of a highly re-enforced, pigmented, white Portland cement based product that is mixed with Chem Add to form a brilliant white smooth coating that is applied onto marbelite pool surfaces that have become rough and stained. Chem pool is applied using a lambs wool roller and/or paint brushes in exactly the same manner as a conventional paint.

## **CHEM KOTE**

A budget quality quality cement based paint that comprises of a composition of grey Portland cement, sand, pigments & limited cement modifiers. Chem Kote is supplied in a powder form and mixed with water prior to application. The product once cured dries to a hard finish.

## **CHEM GRIP**

A vinyl acetate emulsion primer used to aid the adhesion of cement plaster onto difficult substrates like smooth concrete, cement fibre board and weather board. The difficult substrates are primed with Chem Grip immediately prior to the cement plaster/skimming compound being applied.

## **POOL COATING**

A cement-based 2-part white-pigmented product. Two components are mixed together and form a slurry when applied to a prepared pool surface. Smoothens off the rough surface leaving a brilliant white finish.

## **CHEM LEVEL**

A self-levelling screed comprised of a composition of grey cement, sand, and cement modifiers that create a self-levelling underlayment exhibiting excellent flow. Applied at a bed thickness of up to 6mm. Once cured, it's extremely hard, flexible and durable.

*Prices available  
on request.*

## OTHER PRODUCTS

### **PLASKIM**

A ready-mixed acrylic-based product used to skim plastered walls to obtain a high-quality smooth finish. Product may be used to fill cracks. For interior and exterior applications.

### **HYDROPROOF WATERPROOFING**

An acrylic-based compound used in conjunction with membrane to waterproof masonry substrates only with a sufficient pitch to allow water run-off. Available in 1lt, 5lt & 20lt.

### **HYDROPROOF RAIN CHEM**

A synthetic latex used as a mixture added with cement to waterproof most substrates. Also used as a keying agent. Available in 1lt, 5lt & 20lt.

### **RUST FORT**

Rust Fort is an acid-free rust converter for converting rust on all metal surfaces. Available in 1lt & 5lt.

### **GLAZE KOTE**

This is a clear acrylic coating to overcoat wall surfaces. Available in 5lt.

### **ANTI-FUNGICIDE (ADDITIVE ONLY)**

Our Anti Fungicide is a dry film preservative added to water-based paint to help fight funky growth on the surface.

### **MASTER SHIELD**

A water-based acrylic sealer applied to existing previously painted walls where the existing paint film is oxidizing / chalking prior to the new paint system. Available in 1lt, 5lt & 20lt.

### **MASTER GUARD**

A solvent-based Alkali-resistant sealer. Applied to substrates of masonry, slasto, facebrick, roof tiles etc. prior to the application of paint or as a finishing sealer coat. Penetration and binding porous or substandard finishes can be achieved. Available in 1lt, 5lt & 20lt.

### **FLOOR KOTE**

A single-pack polyurethane coating for application onto prepared masonry floors. Excellent gloss finish.

### **FLOOR KOTE UV**

A protective coating for cement floors also applied onto prepared steel surfaces. A two-component, quick-drying, glossy polyurethane coating. Excellent colour retentive properties with UV resistance. Excellent impact and abrasion resistance.

*Prices available  
on request.*

## OTHER PRODUCTS

### CLEAR VARNISH

Our Standard Clear Varnish is a long oil alkalyd formulated for both interior and exterior applications.

### MARINE VARNISH

Marine Varnish is a single-pack polyurethane alkalyd formulated for use in both interior and exterior applications.

### ROAD MARKING PAINT

Our road marking paint is a fast-drying coating for use on concrete or bitumen substrates. When thinning out road marking paint only road marking thinners must be used.

### FIELD MARKING PAINT

Our field marking paint is an acrylic-based marking paint. It can be diluted up to 3:1 with water (by volume).

### CLEANING PRODUCTS

Thinners  
Turps  
Twin Pack Epoxy Thinners  
Twin Pack Polyurethane Thinners  
Degreaser

# PRIMERS

## ECONOMY PLASTER PRIMER

A pigmented plaster primer with alkali resistance for interior and exterior application.

## UNIVERSAL UNDERCOAT

Medium oil alkalyd-based paint system. It's a general purpose undercoat for use on most prepared substrates that include steel, masonry, wood etc. prior to the application of topcoat systems.

## PINK WOOD PRIMER

For use on new dry or unpainted wood surfaces. Supplied in pink or white only.

## SOLVENT BASED ETCH PRIMER

Quick-drying single-pack primer suitable for spraying or brushing. The metal etch primer is not a rust inhibitor. For application onto new weathered iron surfaces.

## WATER BASED ETCH PRIMER (GREY ONLY)

High-performance primer for application onto new or weathered iron surfaces. The low PH is to ensure excellent etching characteristics and cross linking.

## RUST CONVERTER

*Prices available  
on request.*

# PREMIUM TILE PRODUCTS

## PORCELAIN TILE ADHESIVE

A quick-setting 12-hour high-strength grey cement-based tile adhesive designed for fixing of porcelain and other non-porous tiles (eg. natural stones, vitrified, etc.) onto all types of cement-based surfaces as well as other pre-primed surfaces.

## CERAMIC TILE ADHESIVE

A quick-setting 12-hour high-strength grey cement-based tile adhesive designed for fixing of ceramic onto all types of cement-based surfaces as well as other pre-primed surfaces.

## FLEXIBLE TILE ADHESIVE

Ready-to-use latex-based paste for installation of ceramic, clay, stone, cement tiles and mosaics. Suitable for interior wall and floor tile applications only. The highly flexible nature of this product makes it ideal for fixing tiles onto pre-primed wood, gypsum boards and metal surfaces.

## WATERPROOF WALL & FLOOR TILE GROUT

A high-quality, fully waterproof grout product for general use on wall and floor tiles.

## RAPID-SET TILE ADHESIVE

A quick-setting 6-hour high-strength grey cement-based polymer-modified tile adhesive designed for fixing ceramic, clay, porcelain, natural stone and cement-based tiles onto all types of cement-based surfaces as well as other pre-primed surfaces. Professional-grade adhesive recommended for projects with a short turnaround time or for applications that require high compressive strength like tiled garage floors. Suitable for wall and floor applications as well as installing tiles in intermittently wet areas as well as underwater applications. For interior and exterior application.

## TILE KEY

Acrylic latex cement additive to increase water resistance, flexural and adhesion strengths of cement-based powders like tile adhesives, screeds and cement plasters. Particularly recommended for surface preparation of difficult-to-tile substrates or heavy duty tile applications requiring exceptional adhesion and compressive strengths.

## TILE BOND LATEX ADDITIVE

An acrylic latex cement additive to increase water resistance, flexural and adhesion strengths of cement-based powders like tile adhesives, screeds and cement plasters. This product is recommended for heavy-duty tile applications, permanently wet applications, and exterior applications exposed to harsh weather. This product is also suitable for priming of friable or chalking plasters.
